CLOSURES

We strive to continuously exceed our customers requirements

Flue & Chimney Clamps ◦ Clamp Bands ◦ Closing Rings ◦ Handles ◦ Drum Closures ◦ Wall-Bands ◦ Duct Clamps
Engine Clamps ◦ Pull Rings ◦ Pipe Clamps ◦ Channel Bands ◦ Locking Bands ◦ Locking Rings

Get a grip!

Quote from British Touring racing car champions:

"We are always looking to improve our cars performance, so its always beneficial to find a supplier capable of meeting our high demands and expectations", commented Oliver Collins, Team Manager, Team Dynamics, who design, build and run cars for Team Halfords.

"We look forward to developing a relationship with Berger Closures, and to further improve our product with their help."

Berger Closures engine air in-take clamps were designed and manufactured in the UK.

Supplied to the leading manufacturers of metal, plastic and fibre drums, our closing rings are manufactured, tested and designed in-house at our factory in Peterlee together with our world-class customer base to comply with all relevant quality requirements. We also supply to the automotive, garden products, filtration, ventilation, ducting, domestic plumbing, defence, nuclear waste and underwater exploration sectors.

Our tooling for the drum closures and clamp bands is made using state-of-the-art manufacturing equipment. We can also make tooling for other applications.

Quote from company newspaper of leading UK-based world-class drum manufacturer

"The new... container is the result of a tripartite association between (the drum company), closing ring specialist Berger and (the end user chemical company)." ... "The lid is kept in place by a high performance external overlap ring which has new design features to enable it to meet rigorous UN drop testing standards."

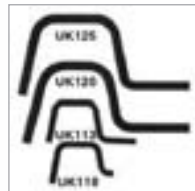

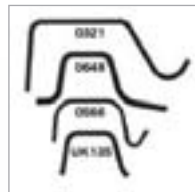

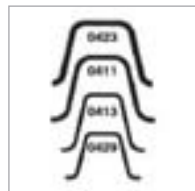

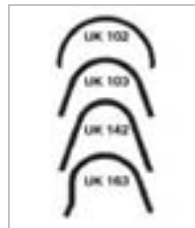

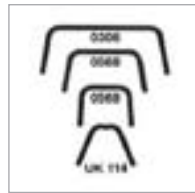

"Relatively minor modifications were made to the lid, but the real work was done in designing a closing ring strong enough to withstand handling to make a perfect seal", (the quality controller) added.

... "But that wasn't all. Representatives from (the drum factory) and Berger worked with (the chemical company's) own engineers to design a new automatic line at the (chemical) company's (UK) factory..."

(The quality controller) said "The entire project is a superb example of suppliers and customers working in harmony with one another."

We offer a wide range of closing rings, profiles, handles, gaskets and other packaging accessories

Profile scale 1:2

Product Range

We manufacture all shapes, sizes and colours of drum closures, clamp bands, clamping rings, closing rings and handles for UN (liquids and solids) and non-UN drums as well as a range of other applications. These can be manufactured in iron-zinc, zintec, galvanised, zalutite or stainless steel and can also be powder-coated in different colours.

Working in partnership with our client base, we have produced the best performing UN Liquids rings in Europe, manufactured to high precision tolerances using specialist machinery.

Closing devices welded or rivetted onto the closing ring include: quick release/external lever toggles, internal levers, lugs for nut and bolts, and latches

Diameter range is from 60 mm - 1000 mm, while material thickness ranges from 0.5 mm - 2.0 mm.

We make over a 100 different profiles/shapes and do all design and manufacture of tooling for new profiles in-house.

Radius cuts can also be put in the ends of the ring to ensure no sharp-edges as well as deburrers to minimise sharp edges on the closing rings.

Overlaps for the ring-ends are designed to maximise ring performance.

Tool-making

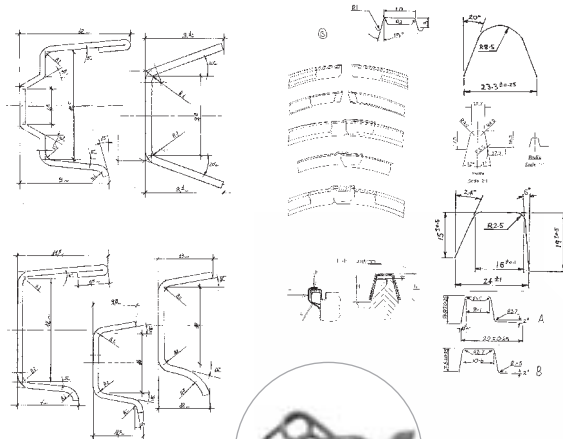

We have state-of-the-art toolmaking machinery with the latest CNC CAD/CAM technology and can make a range of tools and other components for you.

Handles

Drop-handles, pail handles, strap handles, anti tamper seals t-pieces - you name it and we can generally supply it.

Steel Pressings and Plastic Parts

We can have your special requirements made at competitive prices.

Accessories

We supply a wide range of accessories:

Bottles & Jars

- Cylinder Bottles
- Modern Round Bottles
- Wide Mouth Jars

Metal Cans & Tins

- Industrial Round Seamless Tins
- Industrial Slip Cover Cans
- Screw-top Metal Cans
- Paint Can Overseals and Can Clips
- Ergo-Pak Pail Shipping System

Drum & Tank Liners

- Form-Fitting IBC Tank Liners
- Straight & Round Bottom Flexible Drum Liners
- Polyethylene Pail Liners

Drum Covers

- Polyethylene Drum Covers
- Premium Reusable Drum Covers
- "Shower Cap" Drum Covers
- Seamless Drum Liners

Drum Deheaders

- Top-Off Manual Drum Deheader
- Wiz-Kid: The Next Step Up In Manual Deheading

Security Plugs, Overcaps & Seals

- Capseals and Sealing Tools for Round-Head Plugs
- Plug-N-Lok: Padlockable Security Plug
- SambaCap: Plastic, Tamper Evident Overcap
- Clicklock: Tamper Evident Capseal

Quilts & Heaters

- Drum Quilts, Pallet Quilts and IBC Quilts
- Flexible Silicone Steel Drum Heaters
- Flexible Silicone Rubber Heaters For Plastic Drums
- Pail and Drum Heating Jackets
- Blanket Heater for Plastic IBC
- Acra Electric Drum and Pail Heaters

Wrenches

- IBC Fill Port Cap Wrenches & IBC Valve Wrenches
- Lightweight Aluminum Drum Plug Wrench
- Universal Drum Wrench

Pail & Cover Openers

- 5 Gallon Pail Opener
- 3 in 1 Pail Opener
- "Bucket Buster" Cover Opener

Inspection Lights

- Rugged UV Drum Inspection Black Light
- Heavy-Duty Drum Inspection Light

Taps/Faucets

- Polyethylene taps/Faucets
- Gate Valves - An Industry Favourite for Thick Liquids

5 Gallon & 95 Gallon Spill Response Kits

Pumps

- Ezi-action Pumps Deliver On the UP And Down Stroke
- All PVC Heavy-Duty Siphon Pump
- Economical Drum and Pail Pumps
- EnviroPump Chemical Pump Gets Drums Really Empty
- Lever-Action Steel Drum Pumps
- Economy Steel Pump
- Plastic Rotary Drum Pumps
- EnviroWedge Helps Empty Drum
- Polyethylene Siphon Pump

All-In-One Lifter For Drums

Heavy-Duty Mixers For Liquids and Dry Material

Plastic Salvage Drums with Twist-off Cover

Ultra Drainseal: Your Drain's First Line Of Defence
